## **Ratings Report**

### **Suggestion Summary**

Student feedback consistently highlights a desire for a stronger emphasis on practical, real-world application, moving beyond theoretical concepts through methods like case studies, guest speakers, hands-on projects, and interactive workshops. There's a clear call for more engaging, active, and collaborative learning methodologies, advocating for a reduction in traditional lecture time in favor of group activities. Furthermore, students seek improved instructor communication, clearer expectations for assignments, more timely feedback, and structured office hours. Finally, they request tailored support for both struggling and advanced students, alongside additional supplementary resources such as online tutorials and practice problems.
