Suggestion Summary

This student feedback highlights several key areas for improvement and focus: 1. **Enhanced Career and Skill Development:** Students strongly advocate for earlier and more focused placement training (including programming-specific guidance), increased technical sessions, integration of industry-oriented coursework, and the inculcation of research and patent practices. A stronger emphasis on student-industry interaction is also desired. 2. **Improved Infrastructure and Resources:** Suggestions include upgrading laboratory facilities and improving faculty expertise. 3. **Holistic Student Growth:** There's a significant call for supporting extra-curricular activities (like dance and drama cells), potentially managed by external experts, to foster fundamental growth beyond academics and provide leadership opportunities to build confidence and morale. 4. **Alumni Engagement:** A specific suggestion is to prioritize providing value to alumni before seeking contributions. Overall, the feedback points towards a desire for more practical, industry-relevant education, better resources, and a more comprehensive college experience that nurtures both academic and personal growth.
